

SQUINCHER

HYDRATE YOUR LIFESTYLE™
ELECTROLYTE REPLENISHMENT

The Sqwincher® Brand Story

For over 45 years, the Sqwincher brand has proudly fueled individuals with electrolytes. Sqwincher products are scientifically formulated to rehydrate and replenish the body with necessary minerals - potassium and sodium.

At the core of the Sqwincher brand's history are millions of industrial athletes. It has, and continues, to hydrate the bloodline of America - the hard-workers . . . These professionals across the country, in plants and factories everywhere, depend on it. Their strenuous environments and experiences are credited for the innovative portfolio of products, dispensing options and formulations that Sqwincher developed over the years.

Hydration

No matter who you are, hydration is a necessity. The body is made up of 60 - 70% water.^{1,2} It is important to maintain this level or fluid balance for proper health. Experts recommend 3.7 liters of water for males and 2.7 liters for women a day.^{1,2} However; water alone can't put back all the minerals the body requires. In comparison, too much water can cause mineral imbalance in the blood.³ So, why Sqwincher electrolytes?

Sqwincher Electrolytes

Electrolytes are responsible for maintaining vital body functions such as: nervous system, cell function, muscle performance, fluid balance and more.⁴ The Sqwincher brand not only understands the importance of electrolytes but recognizes no hydration solution is the same.

Sqwincher products are dedicated to providing consumers electrolyte choices that fit their lifestyle and dietary preference. Starting 1975, the Sqwincher brand was formulated with a unique electrolyte composition of potassium and low sodium. Since then, it was obvious to evolve with the needs of customers by expanding on the original formula.

Sqwincher Formulas

The Sqwincher brand offers three unique electrolyte formulas to meet the needs of diverse individuals:

- Sqwincher® original
- Sqwincher® ZERO
- EverLyte®

Each formula is offered in multiple hydration options: powder or liquid concentrates, ready-to-drink, liquid or powder single serve. The Sqwincher brand is most noted for it's famous electrolyte freeze pops - Sqwincher Squeeze®. No matter which formula you choose, you can count on great tasting electrolytes to replenish and rehydrate.
